Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 4/28/04.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

DETAILED ACTION

This Office Action is in response to the amendment filed April 24, 2004 for the above identified patent application.

Claim Rejections - 35 USC § 102

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 1, 2, and 9-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Kamamoto (JP 10-89431).

Kamamoto illustrates an input member frictionally engaging an output member, wherein a profile indicating a gap which is formed between the input member and the output member is a profile other than a circular arc profile, the gap being on a plane perpendicular to a vector indicating friction force between the input and output members. It is noted that Kamamoto is described in the specification as "prior art," however the claim language does not appear to preclude the prior art reference.

Response to Arguments

2. Applicant's arguments with respect to the prior art of Kamamoto (filed April 28, 2004) have been fully considered but they are not persuasive.

Applicant argues the Kamamoto reference is a Lundberg's profile which is shown by the dashed line in Figure 6 of the instant application, wherein the Lundberg's profile provides a contact stress distribution which increases in areas near edges of the contact region. This argument is not persuasive because the claims do not preclude a profile

where the contact stress distribution first increases then monotonically decreases.

Referring to Figure 6 of the instant application, it is understood the Lundberg's profile provides a contact stress which first increases in an area near the edge of the contact region, however Figure 6 also shows the contact stress distribution monotonically decreasing in an area after the stress distribution increases.

The arguments with respect to the claim rejection based on Waltz et al., Goi, and Strecker are persuasive, and the rejection is hereby withdrawn.

Allowable Subject Matter

3. Claims 3, 4, 13, 14 are allowed.

Conclusion

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
